The revolt in the Southern portion of the Republic, except so far as concerns a few scattered parties of mountaineers and Indians, who have mostly exiled or in prison, many of them under sentence of death.

On the 22d day of March, at half past eight in the morning, an earthquake, which shook the mountain range of the Chimborazo for the space of Quito, and killed from 2,000 to 5,000 persons. The churches, monasteries, convents and State edifices are almost all rent to fragments. The convent of San Augustin, the tabernacle de la Capilla. the temple of the Sagrario, the Cathedral, the convent of Santo Catalina, the Palacio del Obispo, the chapel of la Merced, the chapels of the Cathedral, of the Campania, of the Hospital, of Carmen bajo, the cloisters of the convent of Santa Domingo, a part of the Convictorio of San Ferthe convents of San Diego, Santa Clara and Santa towns of San Antonia, Cotacolla, Machaelii, Chillogalio and Magdalena, have been destroyed. The Ambato and Alausi, and in Tiupullo the earth opened in various places. The earthquake was also felt at Guayaquil, but did no damage there.

The temples of San Francisco, del Sagrario and Santa Clara were of beautiful architecture; the temples and convents of Santo Domingo, la Merced and San Augustin all had fine stone facades The boldest of the lookers-on held his breath in and towers. The temples of Santa Catalina and suspense, as the daring man receded from the Concepcion, and the Hospital also had stone fa-

Quito is said to contain about 50,000 inhabitants. It is built on an extensive plain against bolder and longer. The stilts of course were so the mountains of Panecillo, and Pichincha, and is placed that the current struck only against their about 9,400 feet above the level of the sea. Most sharp edge, and produced but little effect; but of the houses are two stories, some three, and a the danger from sunken rocks, and the conviction part one story. Many are built of burnt brick, that a single false step would send him to death, with handsome facades, but the greatest portion produced a feeling that was horribly painful are of unburned brick or adobe.

The Atlantic Cable.

was expected of it. Not more than half a dozen guished from the foaming waters. messages have passed over it at most. A few words As he approached the deepest and most danas to the cause of its failure. The Electrotypist of gerous part of his route, the suspense became more the United States Coast Survey, Mr. George Ma. | learfully intense. No word was spoken, except thiot, when it is was proposed to lay a submarine | that one man offered another \$5 for a moment's cable across the Atlantic, published, in the Coast | use of his lorgnette, which offer was passed unresults of his investigations into the electrical con- deepest portion of the current, he seemed to tottelegraph. In that paper he described an experi-standing. A few moments more, and he had ment which proves that a battery requires time to reached the Canadian bank-he was safe, and fell generate t e quantity of electricity required to pro- into the arms of two men who were waiting to

to Professor Bache, Superintendent of the Survey, over to him, - and all will agree that it was fairly in which he recapitulates these facts, and attempts | won. to show the reasons why the cable has failed to work. These deductions are based on scientific facts and knowledge of the phenomena of electricity. He illustrates the law laid down as above. and that our readers may understand it, we will attempt to explain in simple terms the means used. An instrument called an electroscope is first procured; this consists of two strips of gold-leaf, hanging side by side. When these are put in connection with any body electrically excited they diverge. The old man seemed thoroughly content, stretched and when the electricity is withdrawn they fall electrical battery, such as is called a Du Luc's pile (after its inventor), is brought in contact with the If we present to the Du Luc's pile a Leyden jar, vergence of the strips. This is an illustration of temporal power would appear to be rapidly passthe Atlantic cable; it is a large Leyden jar, of four ing away. -London paper. acres of surface, and until the whole of this immense surface is well coated with electricity it will not begin to manifest itself at the opposite end. This can not be brought about by making use of of thirty-three States, in eighteen of which slavery strong batteries, for what is wanted is not intensity is not allowed. The relative positions of the free but quantity. It must be taken into consideration and slave States may be shown that the electricity is leaking out in small quantities all along the length of the cable, so that to make it available we must continue pouring in a greater supply, and this is to be brought about by using a battery with large plates and few pairs, which is called a battery of quantity, and not a large number of small plates, which make a battery hundred pairs of plates, each having twenty square see that the fault lies not in the recording instru-

made use of. Mr. Mathiot winds up as follows: "Although the present cable may be incapable of working with with the best electrical management, yet this would not demonstrate that there cannot be a satisfactory of his sagacity." electrical communication across the Atlantic. Certainly I will be justified in saying that the present state of the engineering art, and the experience already obtained in laying submarine conductors, can lay down a new cable capable of transmitting one worked in full regard to the principles of electrici-

The New York Courier of Inquirer says of the the sailing distances between various points would be shortened by, not hundreds, but thousands of miles while the der miles while the der miles, while the dangers now incurred in doubling Capes Horn and Good Hope, would be avoided. Kelly, of this city, fitted out an expedition in '53, Englishmen. at his own expense, for the purpose of surveying this route. He was led to do this from what had been said by Baron Humboldt, and also by General Mosquera, ex-President of New Granada. The have children, although the former husband of the result of this expedition was not favorable, but lady is still living. Grisi, it would seem by an the fourth expedition, after an absence of several anecdote told of her at St. Petersburg, is as ready months, reported that a route had been discovered with her wit as with her voice. Walking out one by which a canal could be built connecting the At- day with her children, she encountered the late lantic and Pacific Oceans, without locks, and at such a cost as would render it available to commerce. On Monday last, Mr. Ward, of this city, your Majesty," she replied, " they are my Marionmade a speech in the House of Representatives, in ettes!" relation to this proposed canal. He stated that the total tonnage owned in the United States that The U. S. steamer Fulton has gone to Paraguay would use this canal, if constructed, is 1,857,485 with a large 11-inch gun, to destroy that nation. tons. The cargoes he values at \$100,294,687, The only trouble with this gun is that the car-

\$193,168,937. Upon this basis he states that the saving to this country from the use of this canal would be \$35,995,930. The aggregate of the trade and tonnage of all nations which would pass through the canal, is estimated at \$467,831,296, and the total saving annually at \$49,530,208, The estimated cost of the work is \$73,687,141, banded together for the purpose of robbery, has and it is proposed that the United States should been completely extinguished, and the leaders are guarantee to pay the interest, at the rate of five per cent. upon the amount expended in the process of the work, from year to year, for the period Ecuador-Terrible Earthquake --- Quito de- of twelve years. This proposal is based upon the stroyed --- Immense Loss of Life and Prop- supposition that this country is to build the canal. Should England and France join, then the amount we would be expected to pay would be \$9,066,666. If the interest only of the amount expended in making the canal be guaranteed, the parties enof four minutes, destroyed almost the entire city gaged in the project expect to be able to raise all the money necessary on the most favorable terms. The canal is to be 100 feet wide, and 30 feet in depth at low water. New Granada is favorable to the enterprise, and has conceded the right to the projectors of constructing, maintaining and operating the canal forever.

Daring Feat at Niagara.

One evening, a couple of weeks ago, two persons were engaged in earnest conversation in the nando, are all partially or wholly in ruins. Also, International Hotel, at Niagara. One of them was a gentlemen from the South; the other a na-Barbara. There is scarcely a house in the city tive of Stonington, Conn., named Andrew Greenthat is not badly damaged. That portion of the leaf, well known for his surprising feats on stilts, palace occupied by the Minister of the Interior, a but who has adopted the name and country of Siggreat part of the College of San Luis, and the nor Gaspar Morelli. The Signor was speaking of splendid mansion of Dr. Albuja, have also fallen. his various astonishing feats on stilts, to which All the principal buildings of the neighboring the Southerner listened incredulously, till at last Signor expressed his conviction that he could cross Niagara River on stilts, between Goat Island and loss of property is estimated at three millions of the falls! The Southerner offered a thousand doldollars; and from the poverty of the people, it lars to fifty on the issue, which, to the astonishwill be impossible to repair and rebuild any great ment of all, was taken. Punctually at the time number of the better class of edifices destroyed. | named Moreili appeared with a pair of stilts about The shocks were felt simultaneously in Tacunga, twelve feet long, made of wrought iron, flat, sharpedged and pointed-shaped in fact almost precise ly like a double-edged dagger. These were firmly lashed to his legs, and he walked towards the terrible river with a confident smile.-He stepped into the water, which in another moment was boiling, gurgling and rushing beneath his feet. shore. He alone seemed unmoved, and passed on, slowly and carefully. His steps at first were very short and carefully made, but afterwards became Once or twice he seemed to lose his balance, and a sickening shudder ran through each one of the beholders. Recovering himself, he still kept on-The Atlantic cable has failed to accomplish what still receded, until he could scarcely be distin-
